

Pipelines

Gilbert Stream realignment

PROJECT FEATURES

- DN750 pipeline realignment
- Steep sided and deep creek & gully crossing
- 13,000m³ cut and fill
- 54m long 2m diameter curved culvert
- All pipeline bends fabricated off site
- Complex construction process with machine winching required on most slopes
- Short pipeline tie in window – required lots of planning
- Full conceptual and detailed design
- Construction and commissioning engineering support
